

**valantic**

# Get started with SAP Analytics Cloud

Our offer

# What's the right way for you to get started?

Are you completely new to the **SAP Analytics Cloud**?

You've heard about it, but you'd like to know what it's really all about?

Are you planning to replace your current BI or planning solution with the **SAP Analytics Cloud**, but you'd like to confirm your decision with a proof of concept?

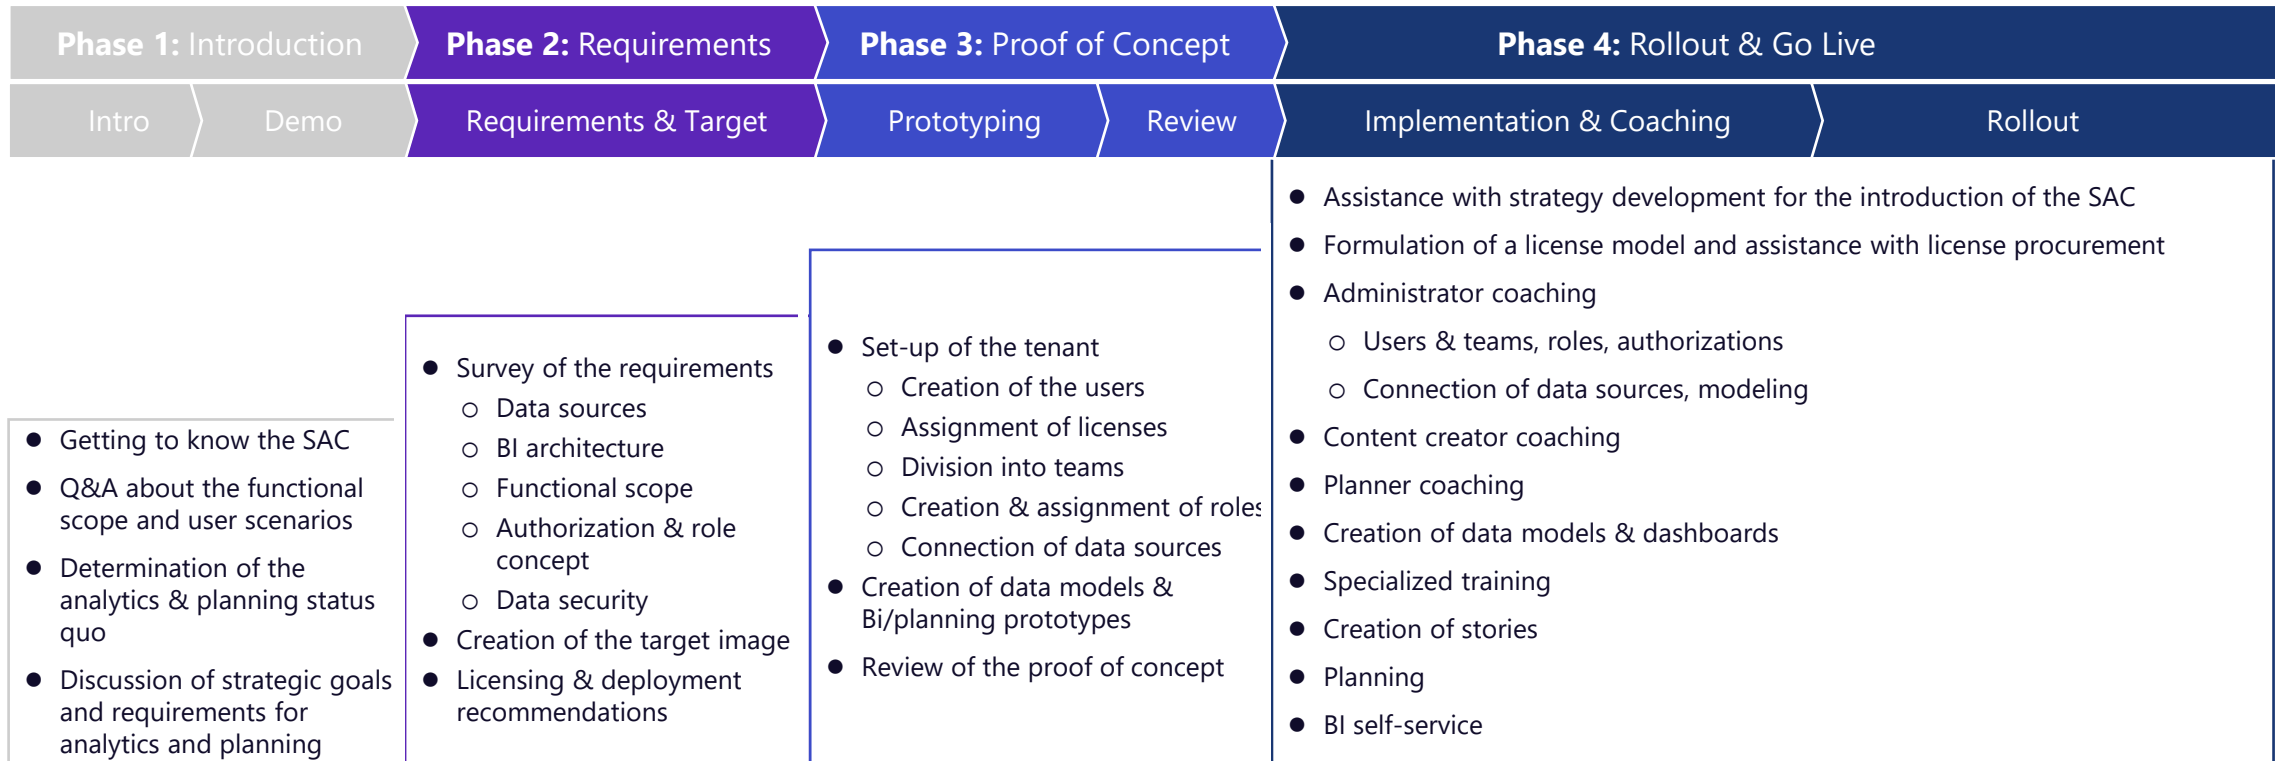

Do you already have an **SAP Analytics Cloud** tenant, but you'd like to guarantee a smooth roll-out?

Are you already using the **SAP Analytics Cloud** and you'd like to coach users in goal-oriented fashion or you have requirements that you haven't been able to implement yet?

# SAP Analytics Cloud-introduction with valantic: We'll accompany you from "initial contact" to the international roll-out

# SAP Analytics Cloud & valantic

## We will help you evaluate & implement the SAP Analytics Cloud (SAC)

- **Introduction** – get to know the SAC & discussion of your requirements and the status quo
- **Requirements** – preparation of your possible planning or analytics user stories
- **Roadmap** – review and documentation of the results & derivation of your individual road map
- **Prototype** – coaching during the set-up of your tenant & implementation of a prototype
- **Rollout** – Support with system connection and implementation

## Your benefits

- **Understanding** – clear understanding of the functional scope and use cases of the SAP Analytics Cloud
- **Evaluation** – qualified comparison with your current BI & planning solutions
- **Scaling** – expansion of the prototype to include company-wide analytics or planning applications & roll-out to additional areas of the company

# We look forward to hearing from you!
