# SAP Sustainability Control Tower

Track sustainable business operations across your organization.

## Objectives

A SAP cloud-based solution's dashboard provides executives a commanding view of business operations and enables faster decision-making in response to events that, if unrecognized, could jeopardize company objectives.

## Capabilities

- Integrates with SAP S/4HANA and SAP ERP to provide a seamless view of sustainability data and reporting.
- Supports a variety of established reporting frameworks, such as TCFD, GRI, CSRD, and SASB. This makes it easy for organizations to comply with reporting requirements.
- Generates insightful reports and visualizations that effectively communicate sustainability data to stakeholders.

## Technology

- Runs on SAP Business Technology Platform
- Possible connection to SAP Analytics Cloud
- Possible connection to SAP Environment Health & Safety
- Possible connection to SAP Sustainability Footprint Management

## At a glance

### Challenges

- Increased demand for ESG transparency
- Comply with changing regulations
- Dealing with missing data

### Benefits

- Scalability and flexibility
- Reporting and visualization
- Improved audit trail
- Predefined data models and calculations

### valantic offering

- Use predefined ESG metrics
- Define your sustainability goals and ambitions
- Create your ESG transparency

# valantic

## Benefits

- SAP Sustainability Control Tower provides a centralized repository for consolidating sustainability data from various sources, including SAP S/4HANA, SAP ERP, and non-SAP systems. It can then consolidate this data into a single view, making it easy to see their sustainability performance.
- SAP Sustainability Control Tower offers to reduce the time and effort associated with gathering data manually, importing files, and preparing a report.

### In a Nutshell

Empower your business in monitoring and steering your sustainability performance with SAP Sustainability Control Tower! Track, analyse and optimize your sustainability initiatives, covering environmental, social, and governance (ESG) metrics. Elevate sustainability with SAP and valantic!
